of each regular issue of the PCT Gazette.

(54) Title: TELECOMMUNICATIONS CONNECTION APPARATUS

(57) Abstract: A wall plug suitable for connecting  
an item of telecommunications equipment to  
a telecommunications network, wherein the  
equipment and the network are separated by a wall,  
the wall including a bore communicating through  
the wall, the device comprising a hollow body in  
the form of a tube engageable in the bore, the tube  
including termination means to terminate a cable  
connected to the telecommunications network;  
and connection means to receive a connector  
of the item of telecommunications equipment,  
the termination and connection means being  
so arranged that with a cable terminated on the  
termination means, connection of the connector to  
the connection means provides an interconnection  
between the equipment and the network.
